

WATERTOWN PLANK ROAD DUAL LANE ON RAMP

As part of the Zoo Interchange Project, the Watertown Plank Road, eastbound and westbound, entrance ramps to I-41 will be modified to accommodate two lanes of traffic entering the ramps. This project will be constructed in three stages over the course of the next several months. Details of the work are outline below:

- **STAGE 1: August 1 through mid-September:** Drivers should anticipate periodic off-peak (9am-3pm) right lane closures on eastbound Watertown Plank Road between Innovation Drive/Swan Boulevard and I-41. A 2 week consecutive lane closure of the right lane is also scheduled to occur within this time frame. The entrance ramps will remain open with the exception of occasional overnight closures that will take place within each stage.
- **STAGE 2: Mid-September through early November:** Drivers should anticipate periodic off-peak (9am-3pm) right lane closures on westbound Watertown Plank Road between Discovery Parkway and I-41. A 2 week consecutive lane closure of the right lane is also scheduled to occur within this time frame. The entrance ramps will remain open with the exception of occasional overnight closures that will take place within each stage.
- **STAGE 3: Early November through December 23:** Crews will work to place sign structures over Watertown Plank Road and will require 2 overnight full closures of Watertown Plank Road and access to and from the freeway ramps.

What each entrance ramp will look like when project is completed.
